PROJECT EXPERIENCE

- Project **MyWeather** (HTML, CSS, JavaScript) - a small weather forecast project. Used html, bootstrap5, css, javascript, weather API from openweathermap.
<https://github.com/KusmiiVasyl/MyWeather.git>
- Project **Addresses** (React) - address database project using mockApi, address editing/adding/deleting, routing implemented, axios and redux connected.
<https://github.com/KusmiiVasyl/AddressDataReact.git>
- Project **Base Of Cars** (Angular) - The car base project, angular material is connected, mockapi is used, the ability to add, edit, delete and search in google cars is made possible through the appropriate form.
<https://github.com/KusmiiVasyl/CarsBase.git>
- Project **Notebook Service** (Java/JavaSpring) - Service for the manager who coordinates transportation, swagger is connected, all CRUD operations are written, the request for all objects is transferred to pagination.
<https://github.com/KusmiiVasyl/NotebookService.git>
- Project **Viktoryna** (C#) - Console quiz program. It is possible to register a user and log in for an administrator. The user can choose and take appropriate quizzes, after which he will be added to the leaderboard. Admin can add, edit, delete quizzes, and view all user information.
<https://github.com/KusmiiVasyl/Viktoryna.git>
- Project **Home Organaizer** (C#/WPF) - the program is designed to keep notes on utility payments, and there is also a to-do list.
<https://github.com/KusmiiVasyl/Home-Organaizer.git>
